

Deck of Cards

Provides:

This API provides a way to simulate a deck of playing cards. You can create a deck and interact with it by shuffling, drawing a card, using a partial deck, etc. Also gives images for each card.

Key Provisioning:

Pain factor (*0=eazpz...5=nightmare*): 

- Does not require a key to use

Quotas:

- No quotas

The Good:

- Simple and easy to use
- Ability to do a lot of operations for a deck of cards
- Provides images for each card
- Detailed documentation, super easy to see intended results etc.

The Bad:

- ...

The Ugly:

- ...
